

TENSION CLAMP FOR FTTH CABLE

ODWAC-22S

Product Description

Flat drop cable clamps are to be used as a dead-end clamp for attaching an overhead round or flat optical fiber cables to hooks or span clamps that are installed on walls or poles.

With high tensile and good corrosion resistant performance, will not affect the optical fiber signal in the cable, and when clamping not only will not damage the cable sheath, and will not cause optical signal loss.

Model	Cable diameter(mm)	Breaking load(kN)
ODWAC-22S	(2-3)*(4-8)	0.5

Product Features

- ❖ With high resistant to stress, tension, heat and vibration
- ❖ Good corrosion resistant performance
- ❖ UV resistant, durable, with excellent environmental stability
- ❖ Tools are not needed and the operation is convenient
